

Addison Amin Reyes Cedano | *Software Engineer*

Santo Domingo, Dominican Republic | +1 849-359-3664 | addison.amin@gmail.com | addisonreyes.com | [Linkedin](#) | [github](#)

Software engineer focused on production-ready web applications with TypeScript, Python, and Rust. Experienced with Next.js, React, Django, FastAPI, REST APIs, authentication, data modeling, automation, BI/reporting tools, and Dockerized delivery. I also build Data/AI workflows and use Rust as a second backend language for performance-critical services where speed, reliability, and control matter.

Skills

Programming languages: Python, TypeScript, Rust

Frontend: Expo, React Native, Next.js, React, Tailwind CSS, Capacitor, HTML, CSS

Backend: Node.js, Django, FastAPI, REST APIs, OpenAPI/Swagger, async programming, backend architecture

Tools and infrastructure: Docker, Git, Linux, CI/CD basics, API integration, deployment workflows

Data and AI: Automation, n8n, AI Engineering, Codex, OpenCode, Scikit-learn, Pandas, Numpy

Databases: PostgreSQL, MongoDB, MySQL, NoSQL, SQL, data modeling

Experience

SEMS, SRL | Distrito Nacional, Dominican Republic | May 2024 - Present

Software Developer | Full-time, Hybrid

- Developed and customized Odoo 16 modules to automate internal business processes, including workflow extensions and feature customization across ERP operations.
- Built integrations between Odoo and internal Django-based systems to synchronize operational data and automate purchasing workflows.
- Implemented functionality that allowed material request orders created in an internal ordering application to be automatically generated as purchase workflows inside Odoo.
- Developed internal web applications using React, TypeScript, Vite, and FastAPI, including a customer price catalog management platform.
- Contributed to frontend mobile development using Flutter for internal business applications.
- Designed backend logic, APIs, and database interactions to support internal operational tools and cross-system communication.
- Collaborated with internal teams and stakeholders to translate operational requirements into software solutions and process automation tools.

SEMS, SRL | Distrito Nacional, Dominican Republic | Feb 2024 - May 2024

Data Analyst | Internship, On-site

- Developed internal reporting and data analysis solutions to support operational visibility and business decision-making.
- Collaborated on the development of a Slack bot that delivered automated daily fuel consumption and pricing analytics reports.
- Built automated visualization workflows and reporting processes to reduce manual analysis and improve data accessibility.

OXSIS, SRL | Santo Domingo Este, Dominican Republic | Sep 2020 - Aug 2025

IT Support Specialist | Part-time, Hybrid

- Provided technical support and troubleshooting for office hardware, printers, email accounts, and internal business systems.
 - Assisted users with ADM Cloud and other operational software platforms used in logistics and customs services workflows.
 - Supported accounting operations through invoice digitization, document scanning, and administrative technical assistance.
 - Performed general IT maintenance and end-user support across internal company operations.
-

Projects

MiniFT - Personal Finance Tracking Application | [Website](#) | [API Docs](#) | [Source code](#)

Performance-oriented finance tracker with a Rust backend, PostgreSQL, authentication, Dockerized deployment, and a TypeScript dashboard. Designed a production-style backend with strongly typed domain logic, persistence, authentication, and deployment-ready configuration. *Tech: Rust, Rocket, PostgreSQL, TypeScript, Next.js, React, Tailwind CSS, Capacitor, Docker*

AnimeSR - Recommendation and Discovery Platform | [Website](#) | [API Docs](#) | [Source code](#)

Recommendation-oriented catalog pairing FastAPI backend filtering, search, and machine-learning-assisted discovery with a TypeScript interface. Built backend search, recommendation services, REST endpoints, and API documentation for catalog discovery. *Tech: Python, FastAPI, Scikit-learn, Next.js, React, TypeScript, Docker*

Done Loop – Mobile local-First Productivity Application | [Website](#) | [Source code](#)

Done Loop is a free, open source, local-first productivity app for habits, tasks, calendar context, reminders, and lightweight daily planning. *Tech: TypeScript, Expo, React Native, SQLite*

Education

UNICARIBE - Engineering Degree, Software Engineering | *Apr 2025 – Present*

TECH Global University - Diploma of education, Backend Engineering | *Oct 2025 – Nov 2025*

ITLA - Associate Degree, Artificial Intelligence | *Aug 2021 - Dec 2023*

Courses and certifications

TALENDIG - Bootcamp, Fullstack developer | *Jul 2025 - Jan 2026*

INFOTEP - Technical degree, Database Programming | *Jan 2024 – Dec 2024*

Completion certificates, IT credentials and certifications collected across software engineering | [Certificates website](#)

Languages

Spanish - *Native* | English - *C1*
