

Addison Amin Reyes Cedano | *Fullstack Software Engineer*

Santo Domingo, Dominican Republic | +1 849-359-3664 | addison.amin@gmail.com | addisonreyes.com | [Linkedin](#) | [github](#)

Fullstack software engineer focused on production-ready web applications with TypeScript frontends and Python backends. Experienced with Django, FastAPI, REST APIs, authentication, data modeling, automation, BI/reporting tools, and Dockerized delivery. I also build Data/AI workflows and use Rust as a second backend language for performance-critical services where speed, reliability, and control matter.

Skills

Programming languages: Python, TypeScript, Rust

Frontend: Next.js, React, Tailwind CSS, HTML, CSS, responsive UI

Backend: Node.js, Django, FastAPI, REST APIs, OpenAPI/Swagger, async programming, backend architecture

Tools and infrastructure: Docker, Git, Linux, CI/CD basics, API integration, deployment workflows

Data and AI: Automation, n8n, AI Engineering, Codex, OpenCode, Scikit-learn, Pandas, Numpy

Databases: PostgreSQL, MongoDB, MySQL, NoSQL, SQL, data modeling

Experience

SEMS, SRL | Distrito Nacional, Dominican Republic | May 2024 - Present

Software Developer | Full-time, Hybrid

- Build Python/Django backend services, business logic, validation rules, and RESTful APIs for production operations.
- Develop data exchange workflows, automation, and integrations between internal and external systems.
- Design data models and optimize ORM-based access patterns for maintainability and operational performance.
- Implement automated reporting and internal BI tools that improve data visibility and reduce manual work.
- Collaborate with stakeholders to turn business requirements into reliable, production-ready software.

SEMS, SRL | Distrito Nacional, Dominican Republic | Feb 2024 - May 2024

Data Analyst | Internship, On-site

- Developed data analysis workflows and visualization dashboards to support business decision-making.
- Automated reporting processes, reducing manual data handling and improving reporting efficiency.

OXSIS, SRL | Santo Domingo Este, Dominican Republic | Sep 2020 - Aug 2025

IT Support Specialist | Part-time, Hybrid

- Provided technical support, system maintenance, and troubleshooting in a logistics and customs environment.
- Supported data management, internal systems, process automation initiatives, and operational reliability.

Projects

MiniFT - Personal Finance Tracking Application | [Website](#)

Performance-oriented finance tracker with a Rust backend, PostgreSQL, authentication, Dockerized deployment, and a TypeScript dashboard. Designed a production-style backend with strongly typed domain logic, persistence, authentication, and deployment-ready configuration. *Tech: Rust, Rocket, PostgreSQL, TypeScript, Next.js, React, Tailwind CSS, Docker*

AnimeSR - Recommendation and Discovery Platform | [Website](#) | [API Docs](#) | [Code](#)

Recommendation-oriented catalog pairing FastAPI backend filtering, search, and machine-learning-assisted discovery with a TypeScript interface. Built backend search, recommendation services, REST endpoints, and API documentation for catalog discovery. *Tech: Python, FastAPI, Scikit-learn, Next.js, React, TypeScript, Docker*

EasyToDo - Local-First Productivity Application | [Website](#) | [Code](#)

TypeScript app focused on fast state handling, clean product logic, and a minimal task and habit workflow. Implemented data handling and fast state updates for reliable task management in a distraction-free workflow. *Tech: TypeScript, Next.js, React, Tailwind CSS*

Education

UNICARIBE - Engineering Degree, Software Engineering | *Apr 2025 - Present*

ITLA - Associate Degree, Artificial Intelligence | *Aug 2021 - Dec 2023*

Languages

Spanish - *Native* | English - *C1*
